NEXT.JS

# How to Create a Next.js Project?

This post guides you through the exciting process of setting up a new Next.js project:

SWIPE

# Ready to Build with Next.js? Let's Begin!

This slide sets the stage for creating your first Next.js project using the create-next-app tool.

At first create a new folder with your desired project name > open that folder in vscode > open a new terminal > type the command as shown in picture.

KEEP SWIPING

```
PS E:\nextjs\dummyproj> npx create-next-app@latest ./  
✓ Would you like to use TypeScript? ... No / Yes  
✓ Would you like to use ESLint? ... No / Yes  
? Would you like to use Tailwind CSS? » No / Yes
```

## These dependencies will install in your project by default, Just select Yes/No.

Next.js offers the flexibility to choose between JavaScript or TypeScript also TailwindCSS or plain CSS for your project.

In NextJS if ESLint has been set up, it will also automatically run during every build. Errors will fail the build, while warnings will not. If you do not want ESLint to run during the next build, select No.

KEEP SWIPING 

```
PS E:\nextjs\dummyproj> npx create-next-app@latest ./
✓ Would you like to use TypeScript? ... No / Yes
✓ Would you like to use ESLint? ... No / Yes
✓ Would you like to use Tailwind CSS? ... No / Yes
✓ Would you like to use `src/` directory? ... No / Yes
✓ Would you like to use App Router? (recommended) ... No / Yes
✓ Would you like to customize the default import alias (@/*)? ... No / Yes
? What import alias would you like configured? » @/*
```

# Customizing Your Development Experience:

Choose if you want to make a src folder like react in next.

App Router will contain your Components and all the different pages of your web app.

Choosing default Alias, you can import components using import X from '@components/X' instead of import X from '.././components/X' .

ONE MORE

```
Success! Created dummyproj at E:\nextjs\dummyproj
```

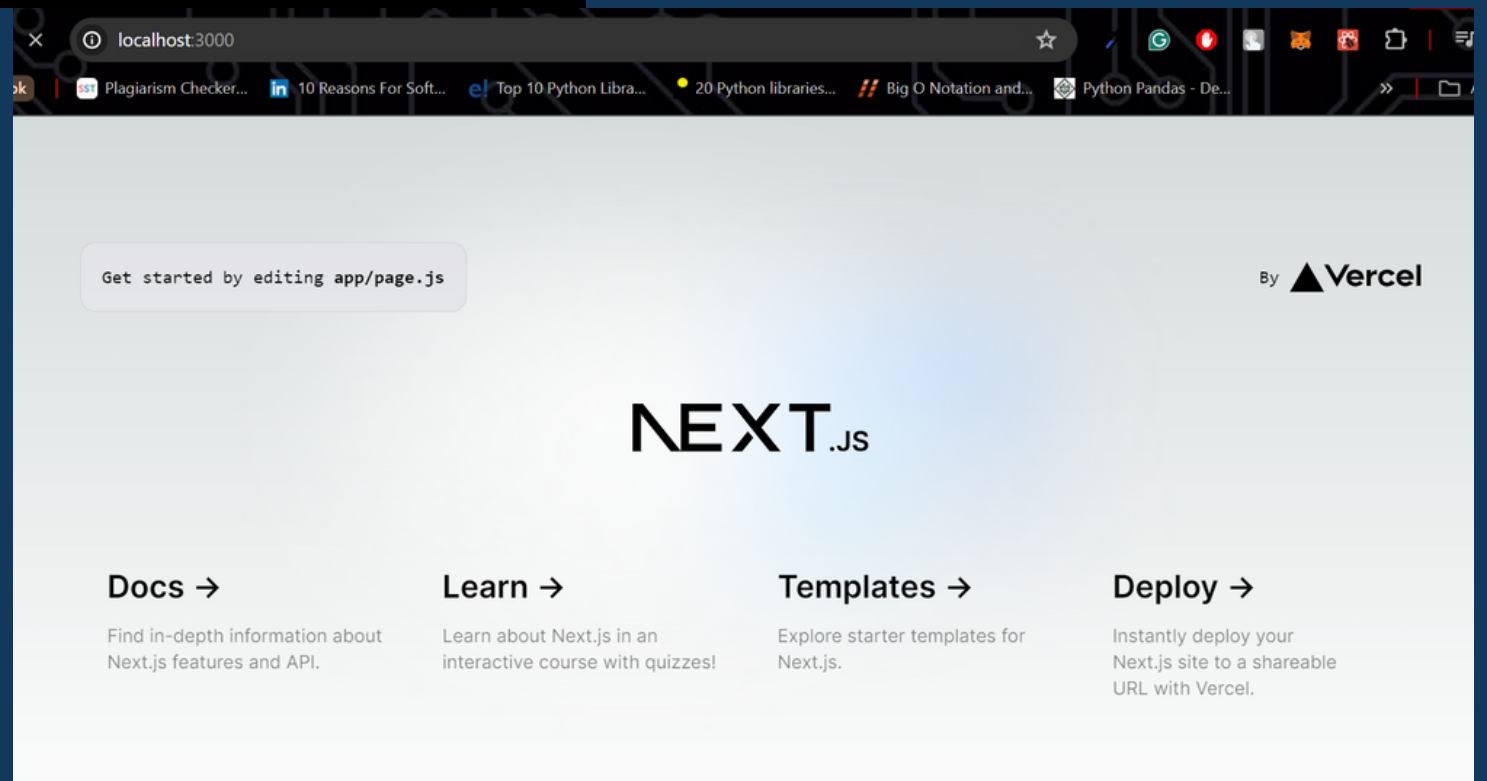

```
PS E:\nextjs\dummyproj> npm run dev
```

```
> dummyproj@0.1.0 dev
```

```
> next dev
```

```
▲ Next.js 14.1.4
```

```
- Local:      http://localhost:3000
```

# Project Initialized: Time to Explore!

Once you make your selections, the tool creates your project. This slide demonstrates the starting of development server.

Open link in web browser a default NextJS page will show up.
